Dear Hamza Khan,

I am reaching out to formally thank you for the engineering services you have provided my company. In early May, I reached out to you for a site plan, floor plan, elevation plans, and a 3d rendering for a bar project I am currently working on. I was impressed that you took the time to have several one on one meetings with me to make sure you could deliver exactly what I needed and assure me that your engineering abilities were capable of completing the project. Since then I have received delivery of all the work that was contracted and wanted to inform you that the City of Perris has accepted and is currently reviewing my application. The work was exceptional and delivered on time as promised. I appreciate your professionalism and patience in working with me and my partner to get the project closer to completion. I will not hesitate to reach out to you in the future if more engineering work is required by the city. Once again thank you for being a man of integrity as well as supporting me through the process of navigating the many hurdles of city engineering demands.

Sincerely,

Antonio Toles, Owner/GM
